Accounting Information Systems for Decision Making Daniela Mancini 2013-04-18 This book contains a collection of research papers on accounting information systems including their strategic role in decision processes, within and between companies. The contributions in this volume emphasize that AIS has grown into a powerful strategic tool. The book provides evidence for this observation by examining a wide range of current issues ranging from theory development in AIS to practical applications of accounting information systems. In particular it focuses on themes of growing interest in the realm of XBRL and Financial Reporting, Management Information Systems, IT/IS Audit and IT/IS Compliance.
