Cultural Techniques Jörg Dünne
2020-08-24 This volume presents the preliminary results of the work carried out by the interdisciplinary cultural techniques research lab at the University of Erfurt. Taking up an impulse from media studies, its contributions examine –from a variety of disciplinary perspectives–the interplay between the formative processes of knowledge and action outlined within the conceptual framework of cultural techniques. Case studies in the fields of history, literary (and media) studies, and the history of science reconstruct seemingly fundamental demarcations such as nature and culture, the human and the nonhuman, and materiality and the symbolical order as the result of concrete practices and operations. These studies reveal that particularly basic operations of spatialization form the very conditions that determine emergence within any cultural order. Ranging from manual and philological "paper work" to practices of opening up and closing off spaces and collective techniques of assembly, these case studies replace the grand narratives of cultural history focusing on micrological examinations of specific

constellations between human and nonhuman actors.

Thinking History Globally Diego
Olstein 2014-11-04 The book brings
together many recent trends in
writing history under a common
framework: thinking history globally.
By thinking history globally, the
book explains, applies, and
exemplifies the four basic strategies
of analysis, the big C's: comparing,
connecting, conceptualizing, and
contextualizing, using twelve
different branches of history.

*Memory, Metaphor, and Aby Warburg's
Atlas of Images* Christopher D.
Johnson 2012-09-15 The work of German
cultural theorist and art historian
Aby Warburg (1866–1929) has had a
lasting effect on how we think about
images. This book is the first in
English to focus on his last project,
the encyclopedic Atlas of Images:
Mnemosyne. Begun in earnest in 1927,
and left unfinished at the time of
Warburg's death in 1929, the Atlas
consisted of sixty-three large wooden
panels covered with black cloth. On
these panels Warburg carefully,
intuitively arranged some thousand
black-and-white photographs of
classical and Renaissance art
objects, as well as of astrological
and astronomical images ranging from

ancient Babylon to Weimar Germany.
Here and there, he also included
maps, manuscript pages, and
contemporary images taken from
newspapers. Trying through these
constellations of images to make
visible the many polarities that
fueled antiquity's afterlife, Warburg
envisioned the Atlas as a vital form
of metaphoric thought. While the
nondiscursive, frequently digressive
character of the Atlas complicates
any linear narrative of its themes
and contents, Christopher D. Johnson
traces several thematic sequences in
the panels. By drawing on Warburg's
published and unpublished writings
and by attending to Warburg's
cardinal idea that "pathos formulas"
structure the West's cultural memory,
Johnson maps numerous tensions
between word and image in the Atlas.
In addition to examining the work
itself, he considers the literary,
philosophical, and intellectual-
historical implications of the Atlas.
As Johnson demonstrates, the Atlas is
not simply the culmination of
Warburg's lifelong study of
Renaissance culture but the ultimate
expression of his now literal, now
metaphoric search for syncretic
solutions to the urgent problems
posed by the history of art and
culture.

Timothy R. New 2018-07-12 Covering 100 years of zoological research, the Handbook of Zoology represents a vast store of knowledge. Handbook of Zoology provides an in-depth treatment of the entire animal kingdom covering both invertebrates and vertebrates. It publishes comprehensive overviews on animal systematics and morphology and covers extensively further aspects like physiology, behavior, ecology and applied zoological research. Although our knowledge regarding many taxonomic groups has grown enormously over the last decades, it is still the objective of the Handbook of Zoology to be comprehensive in the sense that text and references together provide a solid basis for further research. Editors and authors seek a balance between describing species richness and diversity, explaining the importance of certain groups in a phylogenetic context and presenting a review of available knowledge and up-to-date references. New contributions to the series present the combined effort of an international team of editors and authors, entirely published in English and tailored to the needs of the international scientific community. Upcoming volumes and projects in progress include volumes on Annelida (Volumes 1-3), Bryozoa, Mammalia, Miscellaneous Invertebrates, Nannomecoptera, Neomecoptera and Strepsiptera and are followed later by fishes, reptiles and further volumes on mammals. Background The renowned German reference work Handbook of Zoology was founded in the 1920's by Professor Willi Küenthal in Berlin and treated the complete animal kingdom from single cell organisms to

mammals in eight thematic volumes: Volume I Protozoa, Porifera, Colenteratea, Mesozoa (1925); Volume II Vermes (1933/34); Volume III Arthropoda ex. Insecta (1927/1932); Volume IV Arthropoda: Insecta; Volume V Solenogastres, Mollusca, Echinoderma (1925); Volume VI Pisces / Amphibia (1930); Volume VII Reptilia / Aves (1931); Volume VIII Mammalia. The Volumes IV Arthropoda: Insecta and VII Mammalia continued publication into the present with the most recent contributions in English language. Adapting to the accelerating speed of scientific discovery in the past decades the Handbook of Zoology entered a next phase in 2010. In the new edition of the Handbook of Zoology, the original eight thematic volumes gave way for smaller and more flexible groupings that reflect the current state of phylogenetic knowledge. All subsequent volumes were published in print as well as e-book format. The Handbook of Zoology is additionally offered as a database, the Handbook of Zoology Online, which can easily be searched and rapidly updated. Original Handbook material (ca. 28 000 pages) has been reordered along taxonomic (instead of bibliographical) categories and forms the historical basis of this Online Reference Work. As a living Online Reference, the content is continuously updated and new content added. The material can be accessed through taxonomic and subject categories as well as free text, with a diversity of linking and search options. Faster publication times through online-first publication, reference- and cross-linking, and make the Handbook of Zoology highly attractive to both authors and users. Metamorphosis and Other Stories Franz

Kafka 2008-10-02 This collection of new translations brings together the small proportion of Kafka's works that he thought worthy of publication. It includes *Metamorphosis*, his most famous work, an exploration of horrific transformation and alienation; *Meditation*, a collection of his earlier studies; *The Judgement*, written in a single night of frenzied creativity; *The Stoker*, the first chapter of a novel set in America and a fascinating occasional piece, *The Aeroplanes at Brescia*, Kafka's eyewitness account of an air display in 1909. Together, these stories reveal the breadth of Kafka's literary vision and the extraordinary imaginative depth of his thought.

Kärnten und seine Nachbarn Gerlinde Haid 2000 Karnten stellt gemeinsam mit seinen Nachbarländern einen Kulturraum dar, in dem Volkslied und Volksmusik eine grosse Rolle im Bewusstsein der Bevölkerung spielen. Wo liegen die historischen Wurzeln dieser Musik, und was sind ihre brauchmassigen Grundlagen? Erstmals wird in diesem Buch versucht, sich dem gleichen Phänomen von seiten der verschiedenen Sprachgruppen her zu nähern. Beiträge über neue Forschungen zu Karntner Singbräuchen, Brauch- und Ansingelieder der Slowenen in Karnten und Slowenien, Weihnachts- und Dreikonigslieder der deutschen Sprachinseln im Trentin, Hochzeits- und Totenlieder in Karnten und Karnien erlauben Vergleiche über Staats- und Sprachgrenzen hinweg. Die beigegebene CD ist ein unschatzbares Klangdokument zu den im Buch abgedruckten Transkriptionen.

Musik und Subjektivität Daniel Martin Feige 2022-01-31 In der Tradition der Musik ist diese selbst immer wieder als eine Kunstform verstanden worden, die in einem besonders innigen Verhältnis zu dem steht, was uns auszeichnet: unsere Identität. Die Beiträge des Bandes spielen in unterschiedlicher Weise den Gedanken durch, dass Musik an der Konstitution von Subjekten sowie der Gestaltung individueller und kollektiver Selbstverständnisse in geschichtlichen Lebensformen beteiligt ist. Dabei wird vor allem nach der Rolle musikalischer Praktiken und Erfahrungen für die Konstitution, Transformation und Reflexion unserer Selbst als Subjekte

gefragt und das Verhältnis von Musik und Subjekt konstruktiv thematisiert. **The Nutcracker** E.T.A. Musik und Bildende Kunst im 20. Jahrhundert Jörg Jewanski 2009-01-01 Im 20. Jahrhundert sind Bildende Künstler wie Komponisten von ihrer Nachbardisziplin fasziniert und auch etwas neidisch auf die jeweils anderen künstlerischen Ausdrucksmöglichkeiten. Aber was meint die Kulturwissenschaft zu diesen Vermischungen, Verfransungen und unverhohlenen Grenzübergängen, bei denen sich jeder Kunstschaffende das holt, was er gerade für die Gestaltwerdung seiner Kreativität braucht? In diesem Buch werden die nötigen Schritte einer Untersuchung dieser Grenzphänomene in beide Richtungen unternommen: sowohl in die kunst- als auch in die musikwissenschaftliche. Und es werden verblüffende und überraschende Erkenntnisse und Übersichten gewonnen. Wer nach der Lektüre durch die Museen und Konzertsäle der Welt streift, wird manches anders sehen und hören. Ob polyphone Malerei, Musik nach Bildern, Klangskulpturen, Farbenklaviere oder Schallplattencover ... der Reichtum an Fantasie vieler Künstler auf beiden Gebieten ist erstaunlich und bereichert jeden, der Augen hat zu sehen und Ohren zu hören!

Theory of Nonclassical States of Light V.V. Dodonov 2003-03-13 The term 'nonclassical states' refers to the quantum states that cannot be produced in the usual sources of light, such as lasers or lamps, rather than those requiring more sophisticated apparatus for their production. Theory of Non-classical States of Light describes the current status of the theory of nonclassical states of light including many new and important results as well as introductory material and the history of the subject. The authors concentrate on the most important types of nonclassical states, namely squeezed, even/odd ('Schrodinger cat') and binomial states, including their generalizations. However, a review of other types of nonclassical is also given in the introduction, and methods for generating nonclassical states on various processes of light-matter interaction, their phase-space description, and the time evolution of nonclassical states in these processes is presented in separate chapters. This contributed volume contains all of the necessary formulae and references required to gain a good understanding of the principles and current status of the field. It will provide a valuable information resource for advanced students and researchers in quantum physics.

A Guide to Experiments in Quantum Optics Hans-A. Bachor 2019-10-28 Provides fully updated coverage of new experiments in quantum optics This fully revised and expanded edition of a well-established textbook on experiments on quantum optics covers new concepts, results, procedures, and developments in

state-of-the-art experiments. It starts with the basic building blocks and ideas of quantum optics, then moves on to detailed procedures and new techniques for each experiment. Focusing on metrology, communications, and quantum logic, this new edition also places more emphasis on single photon technology and hybrid detection. In addition, it offers end-of-chapter summaries and full problem sets throughout.

Beginning with an introduction to the subject, A Guide to Experiments in Quantum Optics, 3rd Edition presents readers with chapters on classical models of light, photons, quantum models of light, as well as basic optical components. It goes on to give readers full coverage of lasers and amplifiers, and examines numerous photodetection techniques being used today. Other chapters examine quantum noise, squeezing experiments, the application of squeezed light, and fundamental tests of quantum mechanics. The book finishes with a section on quantum information before summarizing of the contents and offering an outlook on the future of the field. -Provides all new updates to the field of quantum optics, covering the building blocks, models and concepts, latest results, detailed procedures, and modern experiments -Places emphasis on three major goals: metrology, communications, and quantum logic - Presents fundamental tests of quantum mechanics (Schrodinger Kitten, multimode entanglement, photon systems as quantum emulators), and introduces the density function - Includes new trends and technologies in quantum optics and photodetection, new results in sensing and metrology, and more coverage of quantum gates and logic, cluster states, waveguides for multimodes, discord and other quantum measures, and quantum control -Offers end of chapter summaries and

problem sets as new features A Guide to Experiments in Quantum Optics, 3rd Edition is an ideal book for professionals, and graduate and upper level students in physics and engineering science.

The Problem of a Chinese Aesthetic Haun Saussy 1995-01-01 The Problem of a Chinese Aesthetic calls for and applies a new model of comparative literature - one that, instead of taking for granted the commensurability of traditions and texts, gives incompatibility and contradiction their due. Exposing contemporary literary theory to the risks of ancient Chinese literature (and vice versa), this book considers a linked series of case studies. To what degree does the translation between languages and texts that we call comparative literature depend on allegory or translation within a single text or language? The author offers an important, new perspective on the reading of the Shih-ching or Book of Odes and the question of allegory and metaphor in the Chinese poetic tradition.
